

Minitab Solution Center

July 2026 Release

1. New Feature in Minitab Solution Center	1
2. New Features in Minitab® Statistical Software.....	1
3. Problems Resolved in Minitab Statistical Software	1
4. New Feature in Minitab DOE™ by Effex	2
5. New Feature in Minitab Data Center.....	2
6. New Feature in Minitab Dashboards.....	2

1. New Feature in Minitab Solution Center

Manage Data Connections with Confidence

Your data stays connected—not just imported. Link directly to files in your repository, prepare them in Minitab Data Center, and use the prepared data across multiple projects. Data Center automatically saves your data, lets you refresh the source, and shows where the data comes from and where to update it.

2. New Features in Minitab® Statistical Software

Explore Data with Graph Brushing

Find patterns, investigate outliers, and understand relationships across data faster with graph brushing in the Minitab Statistical Software web app. Interactively explore your data by selecting observations in one graph, and Minitab highlights the corresponding observations in your worksheet and other graphs.

Simulation Module

Minitab Statistical Software now offers the add-on Process Simulation Analysis Module to provide guided workflows for simulation modeling analyses.

3. Problems Resolved in Minitab Statistical Software

Data is not loaded into the data pane correctly and clears upon refresh. (381311)

Macros do not run properly with select characters. (323723)

Interval plot does not properly display labels for multiple factor levels. (288605)

Comma decimal separators are incorrectly handled in regression. (376775)

4. New Feature in Minitab DOE™ by Effex

Additional language support

Minitab DOE by Effex is now available in French, German, Japanese, Korean, Portuguese, Simplified Chinese, and Spanish.

5. New Feature in Minitab Data Center

Data quality checks

Discover data issues early with automated quality checks. Minitab Data Center validates incoming data and flags missing values, outliers, and rare categories before they affect reporting, analysis, or downstream processes.

6. New Feature in Minitab Dashboards

Connect, Analyze, and Share Simulation Data

Bring your Minitab Simul8® data into Minitab Dashboards and add Simul8 specific assets to track key metrics and share insights with stakeholders. You can adjust simulation properties, rerun scenarios directly in the browser, and immediately see how different decisions impact outcomes.
